Work Experience

Jio
Mumbai - MH

Software Development Engineer — *July 2022 — Present*

- **Developed REST APIs** for Digital Access Management system and optimised the existing code to reduce API response time by 20%.
- **Engineered AI tagging and asset parsing logic** to process 1TB+ assets efficiently using Elasticsearch, Kibana, Logstash, and Google Cloud Storage.
- **Contributed to the business logic** of over 12 gratification projects, increasing user participation & backend reliability.
- **Integrated Redis and RabbitMQ** in 12+ backend projects, enhancing API response speed and supporting high-throughput, low-latency data processing.
- **Implemented WebSocket based real-time communication** for multiplayer apps, supporting a high volume of concurrent users seamlessly.
- **Built a cross-browser JavaScript extension** for JioPC, reducing bandwidth latency by 40% and improving media streaming via native communication.
- **Led frontend development for responsive B2B/B2C sites** (JioEngage, JioCoupons), driving 50K+ monthly visitors and dynamic CMS content management.
- **Developed a multiplayer gratification platform** for JioCinema, scaling to 150K+ active users and ensuring seamless user experience.
- **Upgraded codebase from Angular 8 to 14**, applying best practices to boost application performance, maintainability, and security.
- **Mentored 5+ junior developers**, delivering KT sessions and implementing Agile methodologies to enhance team productivity and code quality.

Eshopbox
Pune - MH

Software Engineer — *Jan 2022 - July 2022*

- **Gained practical expertise in the MongoDB, Express, Angular & Node.js** by building a customer portal from scratch.
- **Boosted performance by 20%** using modular development, efficient schema, and seamless client-server integration.

Skills
